

Franke Omni 4-in1 Boiling Water Tap

The Answer is “Yes” – What is the Question

Can it replace my existing tap? Yes, it requires a standard 35mm tap hole.

Is the water really boiling? Yes, water is stored at 110 degrees in the tank and is 100 degrees when it leaves the spout.

Is it cheaper to operate than my kettle? Yes usually, as only the water required is used, meaning savings in water and electricity.

Is it safe? Yes it has a safety button which needs to be activated for boiling water. When the button is released the water cuts off.

Can I use my existing power supply? Yes, simply plug into a standard 13amp socket.

Does the water heat quickly from cold? Yes, the heating time from empty is 15 minutes. It can then dispense up to 47 cups of boiling water an hour.

Will the tank fit under my sink? Yes the tank will fit into a standard 600mm cabinet.

Do I need to replace the filter cartridges? Yes but only about every 6 months.

Does the tap stay cool in operation? Yes, the tap has a “cool touch” spout and handle.

Can I use the existing hole in my granite worktop? Yes, the tap is boiling water and hot/cold water so no separate tap is required.

Can it cope with my very hard water? Yes, it can be fitted with an alternative filter which will help to reduce limescale.

Does it have a warranty? Yes, the heating tank and the tap both have a 2 year warranty.
